```
{
  "response":{
    "status":true,
    "message":"Token Generated",
    "data":[
      {
        "token":"1ef757abaea62ea7281a67c8542dfa86"
      }
    ],
    "is_deactivate":"0",
    "under_maintenance":"0",
    "sflag":"0"
  }
}
```

## 2. Generate Reference Number

End point: generate\_reference\_number

Calling method: POST

Sample call:

```
{
  "token":"1ef757abaea62ea7281a67c8542dfa86",
  "payer_name":"sfdsd4",
  "payer_number":"123456749",
  "payer_id":"1234",
  "payer_description":"2342dfg dfgsdg fdg"
}
```

Sample response:

```
{
  "response":{
    "status":true,
    "message":"Reference Generated",
    "data":[
      {
        "reference_number":"111197470068254"
      }
    ],
    "is_deactivate":"0",
    "under_maintenance":"0",
    "sflag":"0"
  }
}
```

### 3. Call back

We will call your “call back URL” and share response with you, sample shown below:

Array

```
(  
  [transactionId] => 2344234234  
  [amount] => 1200  
  [status] => success  
  [paymentReference] => 255752911100  
  [date] => 2019-07-04 12:00:00  
)
```
